ABSTRACT:

The gypsum board of high fire resistance with a gypsum core containing cut mineral fibres, preferably glass fibres, contains at least 2% by weight, preferably 5% by weight, of granulated aerated concrete. Preferably, the granulated aerated concrete has a grain size of up to 2 mm, particularly preferably up to 1 mm. The gypsum board can additionally contain up to 2% by weight of vermiculite. It can be laminated on the outside to a glass fibre mat.

ABSTRACTED-PUB-NO: DE 4107623C

BASIC-ABSTRACT:

Plasterboard having high fire resistance has a plaster core (I) contg. cut mineral fibres, esp. glass fibres. (I) contains at least 2 wt% pref. 5-10 wt% aerated concrete granulate (II).

Pref. (I) also contains up to 2 wt% vermiculite and is pref. externally coated with glass fibre web. Pref. the glass fibre web is coated on the side facing away from (I), with an inorganic binder which is at least partly hardened. Pref. (II) has a grain size up to 2mm, pref. up to 1mm.

ADVANTAGE - Less expensive additives are used.

ABSTRACTED-PUB-NO:

EP 503383B

EQUIVALENT-ABSTRACTS:

Gypsum board with high fire resistance having a gypsum core containing cut mineral fibres, especially glass fibres, characterised in that said gypsum core contains at least 2% by weight of aerated concrete granules and said granules have grain size of up to 2 mm, preferably up to 1 mm.
